Abstract

"Change is the law of the nature." Banking industry is changing itself towards the concerns of environment i.e towards Green Banking. The global experiences prove that Green Banking is the future ahead. Indian banks (both private and public) are transitioning themselves around Green Banking - more because of technological and bureaucratic pressures than taking the initiatives themselves. Green mortgages, Green Loans, Green Services are few examples of Green Banking initiatives taken by them.

Banking must be committed towards environmental responsibilities. Scandinavian countries outperform all the other world nations in Energy-Indexes. This paper examines the global performances of the banking industry in India and her Scandinavian counterparts. The paper also conducts an analysis of Green Banking regulatory guidance by Central Banks of both regions.

Environment Protection through Green Banking should be the obligation. This paper seeks to explore the following areas-

1. Aim to conduct a comparative analysis of Indian and Scandinavian landscape in terms of green banking practices.
2. To study different measures and policies adopted by India and Scandinavia .
3. To study the Initiatives taken by Indian banks in order to move in the direction of progress and what India needs to learn from Scandinavia for better performance.

Both qualitative and quantitative data is collected from secondary sources such as newspapers, journals, bank websites for data analysis. This study will be helpful for research scholars, policy makers, Academicians, Indian government etc.

Keywords- Green Banking, India, Scandinavia, environment, initiatives, global.
